These scans can then be processed in Photoshop and other design programs. Video editing software: There are many different types of video editing software; however, your basic choices are between Adobe Premiere and Apple's Final Cut Pro X. Newer Windows-based versions of Autodesk's Movie Maker (free) and Apple's Final Cut Pro X (see Figure 12-2) are also available and are quite popular. **Figure 12-2** Final Cut Pro X is a popular editing software program. ## Finding Out More about the History of Photoshop Before Photoshop was born, the oldest images that most people were doing anything with involved paints and dyes, such as the printing of photographs. Saturday, February 05, 2016 Let's define what New Age is Historian Peter Watson wrote in 1980 that New Age "cannot be defined". But New Age ideas can be pretty easily defined. What is the New Age, or New Age Movement, about? The basic principles of the New Age are directly stated in the following Beliefs and Values section of the Astrology Guide website: "Beliefs and Values of the New Age Movement I. "The New Age Movement represents a major shift in consciousness. The New Age Movement values love and the end of possessions, pleasure, and domination. It does not accept the contradictions of life such as depression and death. "The original New Age Movement was an effort to examine the deep power within us and to seek a new spirituality which would become the basis for a new way of life. The New Age Movement has gone beyond its beginning into many different directions; its basic spirit remains and has changed little." And the basic objective of the New Age Movement is stated as being "to expand consciousness, and the unity of the human family in the world". These ideas of love and unity are very largely derived from the New Age Movement. They are the most popular aspects of New Age. These ideas are not alien to other religions. There are many many religions which include some elements of love and unity. What about other New Age beliefs? The section on Beliefs and Values states that the New Age "rejects cruelty to others, nurtures the natural environment, promotes peace, and nourishes life". None of this is new. Protestants supported mercy, non-retribution, mercy for the environment, and peace between nations. It should be pointed out that the Church of England has believed in all these things since the time of the Reformation. "Nurturing the natural environment" and "nourishing life" are not New Age. They are stated as basic humanist values. And I am sure that all the religions accept these basic humanist values, or would like to. What about the New Age

Select Freeform Pencil from the menu bar at the top of the screen. The cutout will be added to the new layer, which will appear beneath the original image. Click "Apply" to apply the new layer's effects. To be able to add a floating brush behind your stock photo, first add a new layer above the image. Create a new brush from the brush options and place it in the hand on the new layer. Don't try to paint around the edges of the photo—you'll have to repaint the edges in another layer. Use your Freeform Pencil to make the strokes look as realistic as possible. Use the Eraser tool to remove brush strokes and freeform and repaint the edges of your photo. Once you've finished painting, go back to the original layer and select "Paint" from the menu. Set the brush type and size to the ones you created. Click and drag to make the brush move over the photo. Click once to make a hard brush stroke, and click and hold to make the brush stroke soft and more realistic.
